

SooFunny

Color, words, books and math for kids, on iPhone and iPad

Playful learning that runs entirely on the device

Soo X Intelligence LLC · 2026

WHAT IT DOES

Four ways to play and learn

Color

Any photo becomes a coloring page with smooth outlines. Tap or swipe to fill.

Words

754 English words in 32 groups, with real photos, a natural voice and a talking buddy.

Books

Picture books read aloud, plus your own scanned books in English or Chinese.

Math

Flashcards and quizzes for + − × ÷, with stars, a timer and progress reports.

1 · COLOR

Any picture becomes a coloring page

- A gallery of animals, faces, people and the outdoors
- Or a child’s own photo, from Photos or the camera
- Tap or swipe to fill, try Magic colors, peek at the real photo

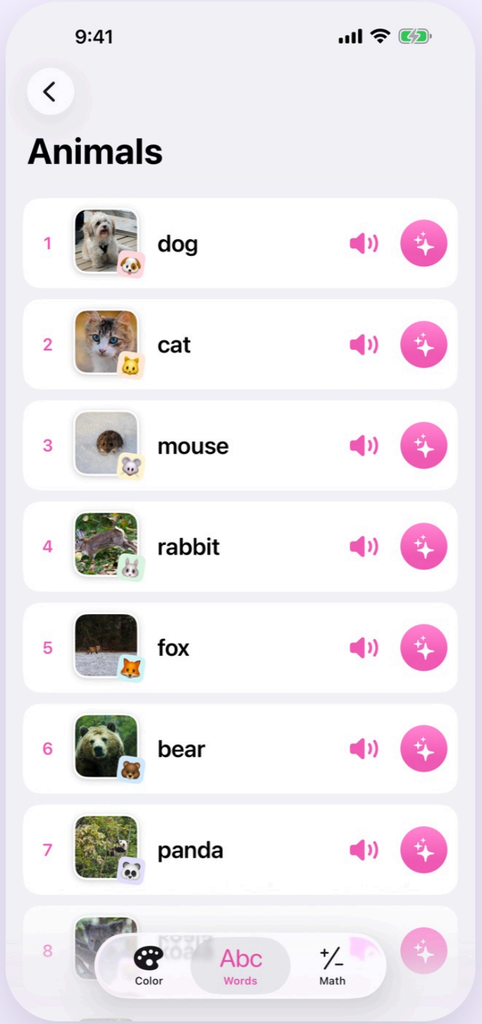

2 · WORDS

754 words, each with a real photo

32
groups, from Animals to Feelings

1–3
real photos per word, all public domain

Hear every word in a natural voice, then tap its letters one by one.

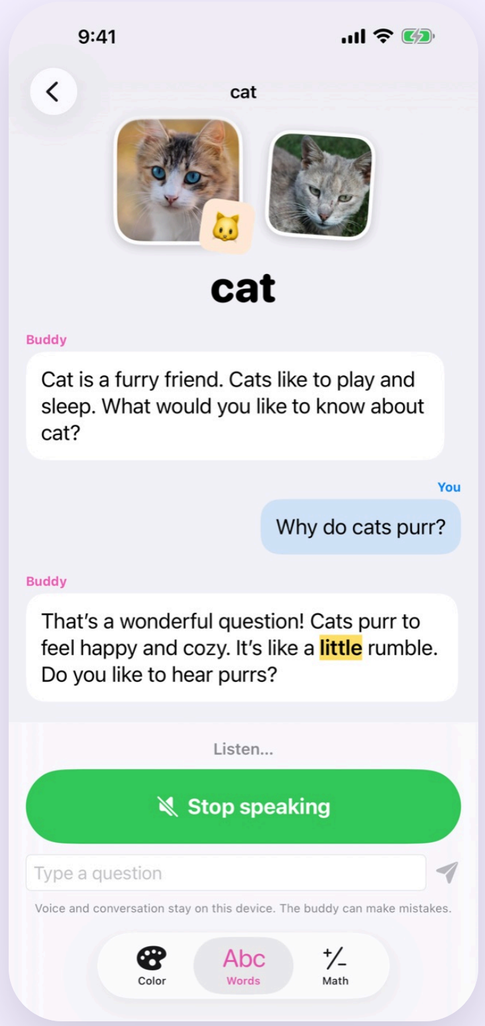

2 · WORDS · TALKING BUDDY

Ask anything about a word

“What does a lion eat?”

- The buddy answers out loud, each word highlighted as it’s read
- Powered by Google’s Gemma 3 1B model, running on the device
- No internet needed, and nothing is sent anywhere

3 · BOOKS

Picture books that read themselves aloud

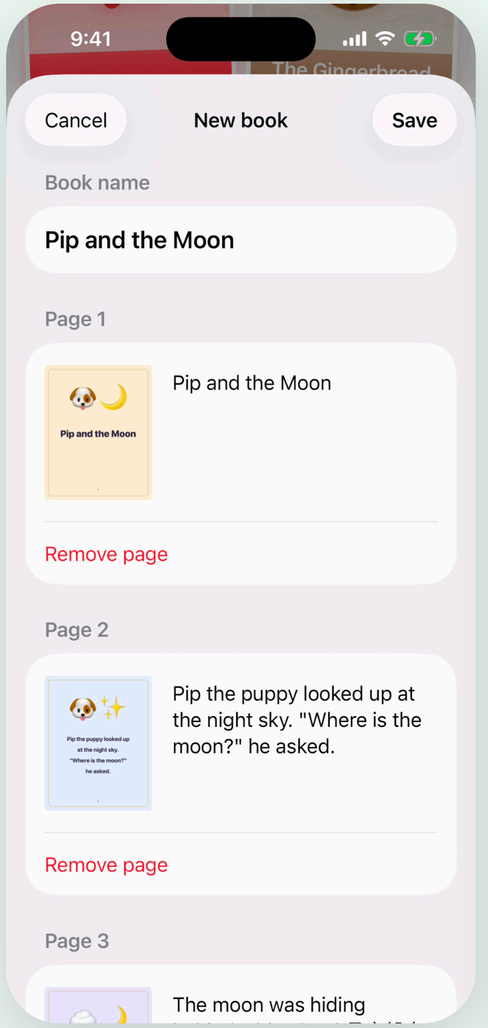

- 10 story books, from The Three Little Pigs to Tang poems
- Each word lights up as it’s read
- Pages turn by themselves, in English or Chinese

3 · BOOKS · YOUR OWN BOOKS

Scan a book, hear it read

- Scan pages with the camera or pick them from Photos, as many as the book has
- The words are read on the device, in English, Chinese or both
- Read along, or make an audiobook to listen to anytime

4 · MATH

Math practice that feels like a game

- Adding, taking away, times and sharing
- Choose the numbers to focus on
- Flashcards, timed quizzes and stars
- Progress reports for grown-ups

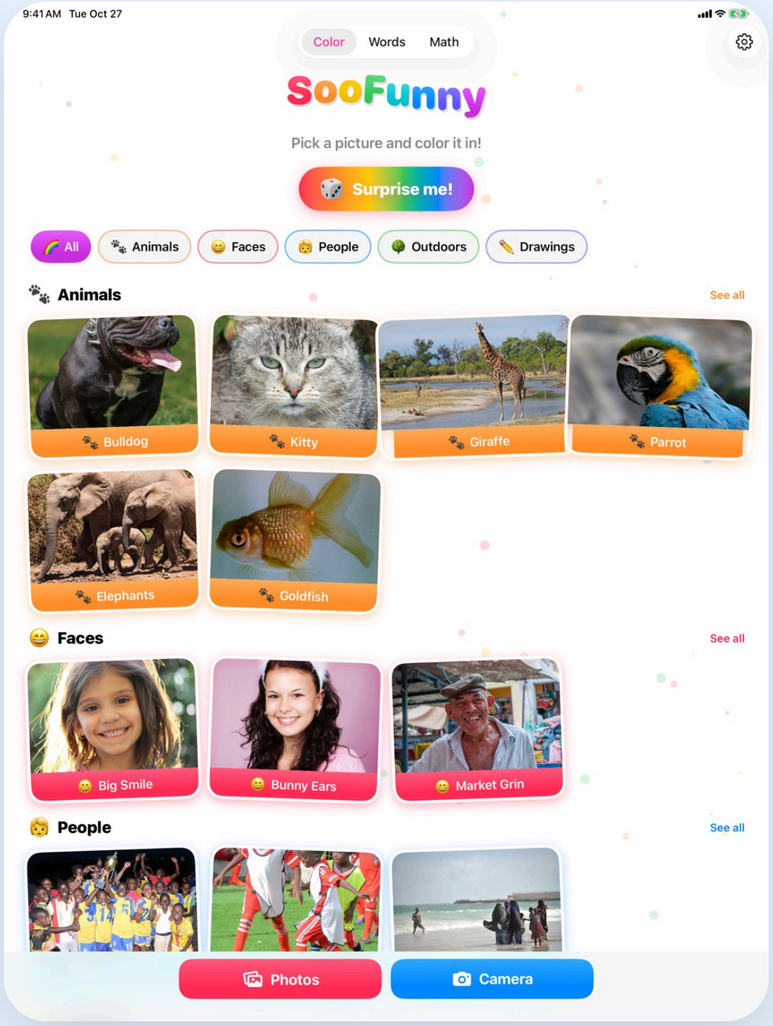

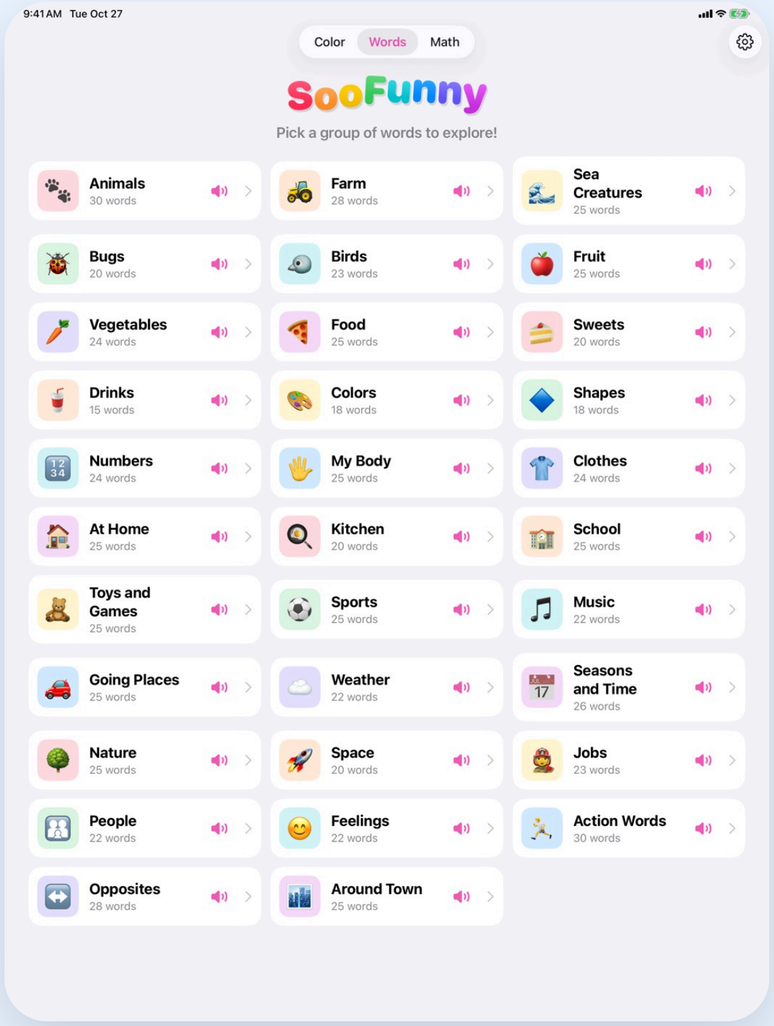

IPHONE AND IPAD

Made for small hands and big screens

The layout grows on iPad: bigger pictures to color and more words on screen at once.

Requires iOS 17 or later.

Everything stays on the device

- Works fully offline
- No ads, no tracking
- No data collected, no accounts
- Grown-up check before purchases and links
